STRONG BODIES

- Start becoming much more physically active. Begin slowly and build up gradually. This is the safest and easiest way to go.
- Delay becoming much more active if:
 - You are not feeling well because of a temporary illness such as a cold or a fever. Wait until you feel better.
 - You are or may be pregnant. Talk to your doctor before you start becoming more active.
- If your health changes so that you would answer YES to any of the above question tell your fitness or health professional. Ask whether you should change your physical activity.

Assumption of Risks: StrongPeople National Program

I understand that physical activity related to the StrongBodies Program, by its very nature, carries with it certain inherent risks that cannot be eliminated regardless of the care taken to avoid injuries. Some of these involve strenuous exertions of strength using various muscle groups, some involve quick movement involving speed and change of direction, and others involve sustained physical activity, which places stress on the cardiovascular system. The specific risks vary from one activity to another, but in each activity the risks range from: 1) minor injuries such as scratches, bruises, and sprains to 2) major injuries such as fractures, internal injuries, joint or back injuries, heart attacks, and concussions to 3) catastrophic injuries including paralysis and death. I understand that the University has advised me to seek the advice of my physician before participating in this activity. I understand that I have been advised to have health and accident insurance in effect and that no such coverage is provided for me by the University or the State of Wisconsin. I know, understand, and appreciate the risks that are inherent in the above-listed programs and activities. I hereby assert that my participation is voluntary and that I knowingly assume all such risks.
